* DHA: docosahexaenoic acid

** ARA: araquidonic acid

SERVING CHART (seek appropriate medical advice)

Age	Water (ml)	Scoops*	Feeds per day
6-12	240	8	4
12-24	240	8	2-3

* 1 level scoop: 4.8 g

FORMAT

400 g
800 g

PREPARATION

1 Wash hands and utensils using clean water and keep clean your work area.

4 Add the required number of levelled scoops in the cup according to the dosage chart. Use the scoop contained in the tin.

2 Wash and boil the cup and preparation equipment with water for 5 minutes.

5 Mix thoroughly by stirring with a cleaned spoon until the powder is dissolved.

3 Boil clean water for 2 minutes and let it cool to approx. 45 °C. Pour the required amount of warm water in the cleaned feeding cup.

6 Check temperature, which must be lukewarm (37 °C), before offering to the baby.

NOTICE: Do not prepare more than one serving at once and use prepared formula immediately. **Throw away the leftover milk.**
